

CPV STAGECOACH SOLAR

CPV Stagecoach Solar is a agrivoltaics project integrating 80-megawatt (MW) of solar photovoltaic (PV) generation in Macon County, Georgia.

Economic Benefits

- Created approximately **100 jobs during construction**, paying millions of dollars in wages and benefits
- Adds new, **long-term revenue** for Macon County to support critical services for residents
- Enables **local renewable energy generation** to take place side by side with continued agricultural use of the land
- Supports local philanthropic initiatives with a focus on **addressing food insecurity, STEM education, and emergency responders**

Increased Local Production

- Delivers approximately **190,000 MWh of solar energy** to Georgia households and businesses
- Generates enough electricity to power **18,000 average Georgia households**

Responsible Operations

- **Incorporates agrivoltaics**, the practice of integrating solar generation with agricultural activity. Grazing sheep utilized for vegetation management across 500 acres
- Furthers Georgia's energy independence by helping to **diversify the state's energy mix**

Location	Georgia – Macon County
Total Installed Capacity	80 MW
Commercial Operations	June 2024

Competitive Power Ventures (CPV) has 25 years of unprecedented success in the development and operation of highly efficient and low emitting electric generation and renewable projects in the United States. CPV is focused on applying its development, financial and project management expertise to advance the next generation of technologies. After bringing on 6.8 GW of natural gas, wind, and solar generation since 2010 and with a current pipeline of over 10 GW of renewable and dispatchable generation projects, including utility-scale carbon capture, CPV is well positioned to help drive the nation's decarbonization goals forward.
