

CPV MAPLE HILL SOLAR

CPV Maple Hill is a 100-megawatt (MW) solar photovoltaic (PV) generation project located on a former coal mine in Portage, Cambria County, PA.

Economic Benefits

- Adds **new, long-term revenue** to the town of Portage to support critical services for residents
- Provides financial support to the **Portage Volunteer Fire Department** to go towards safety training and equipment upgrades
- Supports various educational initiatives through the Portage Area School District, library, and historical society with a **focus on STEM education**
- Created **250 jobs during construction**, paying millions of dollars in wages and benefits
- Invested millions of dollars in **network upgrades** improving the grid and **availability of cost-efficient power** for Pennsylvania households

Increased Local Production

- Delivers up to **185,000 megawatt-hours (MWh)** of generation annually
- Generates enough electricity to power **17,600** average Pennsylvania households

Responsible Operations

- **Repurposes a former coal mine**, transforming a site with few alternative uses into a productive asset
- Expands **renewable resources** and **sustains local environmental quality** while adding new energy generation to the grid

Location	Pennsylvania – Cambria County
Total Installed Capacity	100 MW
Commercial Operations	December 2023
Investment	\$150 million

Competitive Power Ventures (CPV) has 25 years of unprecedented success in the development and operation of highly efficient and low emitting electric generation and renewable projects in the United States. CPV is focused on applying its development, financial and project management expertise to advance the next generation of technologies. After bringing on 6.8 GW of natural gas, wind, and solar generation since 2010 and with a current pipeline of over 10 GW of renewable and dispatchable generation projects, including utility-scale carbon capture, CPV is well positioned to help drive the nation's decarbonization goals forward.
