

CPV MOUNTAIN WIND

CPV Mountain Wind is a 81.5-megawatt (MW) wind generation portfolio comprised of four wind projects: Canton Mountain Wind, Saddleback Ridge Wind, Spruce Mountain Wind, and Beaver Ridge Wind, located in Oxford and Waldo Counties, Maine.

Economic Benefits

- Provides **consistent tax revenue** to host counties that can be used towards community causes and benefits
- Ongoing financial support to **address food insecurity** and support with **heating assistance** in host communities

Increased Local Production

- Approximately **224,500 megawatt-hours** (MWh) of generation annually
- Generates enough electricity to power **19,000** Maine households

Responsible Development

- Expands **renewable resources** and **sustains local environmental quality**
- Partners with government and educational entities to **expand wind education** in the region

Location

Maine – Oxford and Waldo Counties

System Information

- 20 GE 2.85 MW turbines
- 3 GE 1.5 MW turbines
- 10 Gamesa G90 2 MW turbines

Total Installed Capacity

81.5 MW

Acquired by CPV

April 2023

Competitive Power Ventures (CPV) has 25 years of unprecedented success in the development and operation of highly efficient and low emitting electric generation and renewable projects in the United States. CPV is focused on applying its development, financial and project management expertise to advance the next generation of technologies. After bringing on 6.8 GW of natural gas, wind, and solar generation since 2010 and with a current pipeline of over 10 GW of renewable and dispatchable generation projects, including utility-scale carbon capture, CPV is well positioned to help drive the nation's decarbonization goals forward.
